Oxford Companions is a book series published by Oxford University Press, providing general knowledge within a specific area. The first book published in the series was The Oxford Companion to English Literature (1932), compiled by the retired diplomat Sir Paul Harvey. The series has included (in alphabetical order):

- A majority of the the Vienna Dioscurides is devoted to a revised edition of a book written centuries earlier entitled On Medical Matters (De materia medica) by Dioscorides of Anazarbus, a Greek medical practitioner who served as a physician in the Roman army in the first century B.C. His work outlined the therapeutic properties of hundreds of plants and animals.
- Bloomsbury's academic division publishes textbooks, research monographs and reference across the humanities and social sciences, and is the largest academic visual arts publisher. We publish 1,200+ books a year alongside digital platforms. Our portfolio includes Methuen Drama, The Arden Shakespeare, T&T Clark and Fairchild Books, alongside backlist imprints Berg, A&V and Bristol Classical Press.
- Medical anthropology is an interdisciplinary field which studies “human health and disease, health care systems, and biocultural adaptation”. It is believed that William Caudell was the first to discover the field of medical anthropology. Currently, research in medical anthropology is one of the main growth areas in the field of anthropology as historically in the health-care domain, culture referred almost solely to the domain of the patient and family. As seen in the case scenario in Box 1, we can also talk about the culture of the professional caregiver—including both the cultural background of the doctor, nurse, or social worker, and the culture of biomedicine itself—especially as it is expressed in institutions such as

Abstract. This essay examines the history of European empire building and health work in sub-Saharan Africa, focusing on four patterns that shed light on the ethics of outside interventions: (1) the epidemiological and bodily harms caused by conquest and economic development; (2) the uneven and inadequate health infrastructures established during the colonial era, including certain iatrogenic + Anthropology. All Other Anthropology Courses; Cultural Anthropology; First Aid™ remains the most trusted name in USMLE® review—just ask any medical student! this one-of-a-kind study companion offers the most current overview of all core areas on the boards. Included is a host of learning tools, from key facts and mnemonics to

The Mesolithic isotope record is substantial (Fontanals-Colle et al., 2014), and only partly represented in Table 1. While carnivorous diets may be expected in northern colder regions, samples from more southerly parts of Europe, such as Sicily (Monteino et al., 2012), also show carnivory throughout the Mesolithic. The comparative environmental sampling was small in some studies; hence a bias

Kroskrity, Paul. 2004. Language ideology. In Companion to linguistic anthropology. Edited by Alessandro Duranti, 496–517. Oxford: Blackwell. This is a review article that identifies major strands of research on language ideology to date.
